

Bite Me: Vietnam radio script

MVO:

Need a holiday? Come to beautiful Vietnam. A land rich in history and body lice!

Vietnam is long and narrow, just like their giant sphincter tapeworm. The pristine jungles in the north are unspoilt by tourism, mostly because of an ongoing tick plague.

In the south, get your adrenaline pumping with bungee jumping, white water rafting or toxins from the deadly rove beetle. Vietnam is full of white-knuckle thrills. Unfortunately white knuckles are also a sign you've got cholera.

Vietnam! You'll write home about it...if your fingers ever heal from that scorpion bite.

ANNOUNCER:

All new Bite Me. It's the gross side to the world's most beautiful destinations. 8.30 tonight on SBS One.
